DASHBOARD ADDRESSING THE KPI:

- How many containers do I have?
- Where are these containers right now?
- How long have the containers stayed there?
- Are they there for more than normal time?
- Are my containers @ right location they should be?
- Are there any potential losses?
- What is my container utilization (cycle time)?
- What is the average age of my stock?
- What are my issues & returns?
- How many of my containers are getting damaged?
- Who is damaging them? What is the cost per repair?
- What is the level of the content inside the container?
- Has the container been opened? When was it opened?
